

**Luiz Sanches Neto**

Hello! I am very keen to serve as Outreach Coordinator and contribute to the ISATT mission: enhance the quality of education through more insight into research on teachers and teaching, and continue to work to improve its reaching to teachers and researchers worldwide. My current position as adjoint professor in the Brazilian Federal University of Ceará is most due to the ISATT experience. It is not an exaggeration. The ISATT organisation has strongly contributed to my perspective on teaching and research since 2011 when I first participated in one pre-conference as Doctoral Student in Portugal. During the next years I had the opportunity to attend conferences in Belgium and New Zealand with critical colleagues and learn more from the experience of senior members, especially into the collaborative research programme. As a member of the executive committee, working as Outreach Coordinator, my effort will be to promote the ISATT community internationally, fostering association with relevant organisations and networks in distant regions, building connections and long-term partnerships, increasing collaborative research and supporting regional and biennial conferences. Hope to count on your trust. Kind regards!
